

Amal Shyjo

Frontend Developer

Recent graduate with a Bachelors in Information Technology looking to leverage my experience building responsive and scalable web apps.

SUMMARY

- Experience in using React JS components, Forms, Hooks, Router, ContextAPI, Redux, and Animations
- Able to help the team achieve goals by communicating and collaborating on innovative and creative ideas that align with the overall vision of the product and the organization

EXPERIENCE

Freelance — Frontend Developer

2019 - PRESENT

- Developed dynamic and interactive web apps that ensured high traffic, page views, and User Experience for clients.
- Developed an Ecommerce web app for clients, with payment processing, & order tracking.
- Build a Content Management System using Firebase & React for Ecommerce web apps.
- Build a portfolio maker with over 6 different templates which users can use and connect the above mentioned CMS for managing content of the web app.
- Build a Medical record Management WebApp with functionality including chat, video-call, record management, billing and prescription.

PROJECTS

MyHealthZen — Electronic Health Record PWA

[Link](#) [Details](#)

A progressive web app that provides Contactless Hospital Management and Electronic Health record Management (EHR).

The objective was to provide easier patient experience and to reduce miscommunication between patient and doctors through EHR.

Crimzonarc CMS — Content Management System

[Link](#)

A web app (PWA) which can be used to change values in the Firestore database & to manipulate a website's content in real-time.

This CMS was further used for an Ecommerce website & Portfolio maker.

Crimzonfolio — Portfolio maker

[Link](#)

A web app that helps a user easily create a portfolio website & change its content in real-time using Crimzonarc CMS.

At Consulting group — Chartered Accountant Website

[Link](#)

A portfolio website with minimalistic and responsive UI to reach out to their clients. They required a single page design & great SEO. (*In Progress*)

Web-AR-based Business Card — Portfolio maker

[Link](#)

Web AR-based web app where on pointing to the respective business card a virtual image, object or video can be shown on top of it.
